DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 22 August 2008 has been entered.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 37-42 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claim 37 claims a machine-readable medium. Instant specification teaches on page 21, paragraph [0087] that machine-readable media include propagated signals which are not processes, manufactures, or compositions of matter, or any new and useful improvements thereof. Therefore, the claim claims non-statutory subject matter.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 43-44 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant

Art Unit: 2613

art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claim 43 recites the limitation “each of the plurality of access nodes allocating a second path that has a link common with the first path, wherein the first and second paths have different source nodes”. Instant specification does not describe the limitation in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claim 44 recites the limitation “each of the plurality of access nodes deallocating a second path that has a link common with the first path, wherein the first and second paths have different source nodes”. Instant specification does not describe the limitation in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claim 16-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

8. Claim 16 recites the limitation "the first set of one or more links" in lines 19-20 of the claim. There is insufficient antecedent basis for this limitation in the claim.

Allowable Subject Matter

9. Claims 1-7, 10, 12-13, 15, 25-28, 30-36 and 45 are allowed.

Response to Arguments

Art Unit: 2613

10. Applicant's arguments, see pages 13-26 of the amendment, filed 22 August 2008, with respect to claims 1-7, 10, 12-13, 15-28 and 30-42 have been fully considered and are persuasive. The 102(a) and 103(a) rejections of claims 1-7, 10, 12-13, 15-28 and 30-42 has been withdrawn.
